# **INDEX**

### **5e Sprint**

#### Descripció del 5e Sprint:

• Afegir el camp user\_id a la taula de videos. Per a que al crear un video es guardi l'usuari que l'ha afegit. Per tant, s'haurà de modificar el controller, model, helpers...

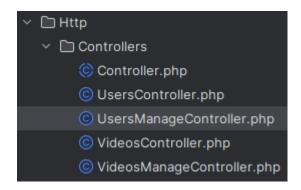

#### GLOBAL M7, M8 I M9

DAM 2n

• En cas que al modificar el codi falla algun test d'un sprint anterior, s'han d'arreglar.

#### FET

• Crear usersManageController en les funcions testedby, index, store, edit, update, delete i destroy.

```
php 2025_01_23_143925_create_videos_table.php
                                              O UsersManageController.php ×
                                                                        ▲ 15 💥 3
 namespace App\Http\Controllers;
∨ class UsersManageController extends Controller
    public function index()
         $users = User::all();
         return view( view: 'users.manage.index', compact( var_name: 'users'));

... «Marc»

      public function create()
          return view( view: 'users.manage.create');
```

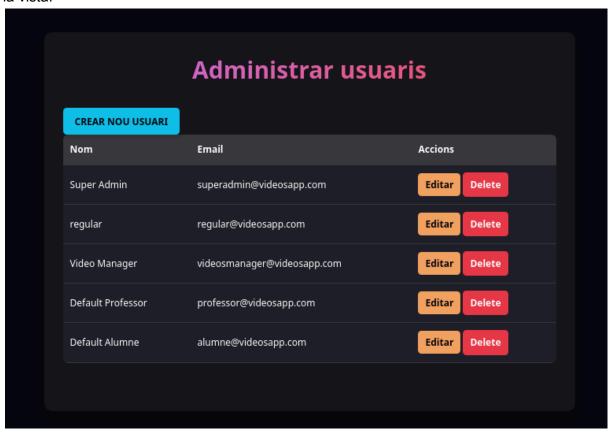

• Crear la funció index i show a usersController.

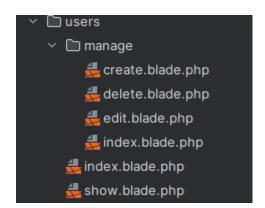

```
UsersManageController.php
                                                        © UsersController.php ×
create_videos_table.php
                                                                               A 4
    namespace App\Http\Controllers;
    class UsersController extends Controller
⊫
        public function show($id)
            $user = User::findOrFail($id);
            return view( view: 'users.show', compact( var_name: 'user'));
        public function index()
            $users = User::all();
            return view( view: 'users.index', compact( var_name: 'users'));
```

 Crear les vistes per al CRUD que només poden veure-ho els que tinguin els permisos adients: resources/views/users/manage/index.blade.php, resources/views/users/manage/create.blade.php, resources/views/users/manage/edit.blade.php, resources/views/users/manage/delete.blade.php.

#### la vista:

• A la vista index.blade.php, afegir la taula del CRUD d'usuaris.

```
<style>
                                                                           A1
</style>
<h1>Administrar usuaris</h1>
<a href="{{ route('users.manage.create') }}" class="btn-create">Crear nou usuari</a>
<thead>
     Nom
      Email
      Accions
   </thead>
         {{ $user->name }}
         {{ $user->email }}
            <form action="{{ route('users.manage.destroy', $user->id) }}" method="POST" onsubm
                <button type="submit" class="btn-delete">Delete</button>
            </form>
```

• A la vista create.blade.php, afegir el formulari per posar els usuaris, s'ha d'utilitzar l'atribut data-qa per a que sigui més fàcil identificar per als testos.

```
∆6 ±1
<div class="container mx-auto mt-8">
         <h1 class="text-2xl font-bold mb-4">Creacio nou usuari</h1>
                                       Oforeach ($errors->all() as $error)
                                                   {{ $error }}
                   </div>
         <form action="{{ route('users.manage.store') }}" method="POST" data-qa="form-create-user" class="</pre>
                   <div class="mb-4">
                             <div class="mb-4">
                             <label for="email" data-qa="label-email" class="block | text-white">Email</label>
                              <input type="email" name="email" id="email" class="form-control border ■ ■border-gray-308</p>
                   <div class="mb-4">
                              <input type="password" name="password" id="password" class="form-control border > > border
                   </div>
                   <div class="mb-4">
                              <label for="password_confirmation" data-qa="label-password-confirmation" class="block | | | | | |
                   </div>
                   <br/>
         </form>
</div>
```

• A la vista edit.blade.php, afegir la taula del CRUD d'usuaris.

```
<style>
                                                                                                                                                                                                                     A7 ±1

```

DAM 2n

• A la vista delete.blade.php, afegir la confirmació de l'eliminació de l'usuari.

• Crear la vista de resources/views/users/index.blade.php on es vegin tots els usuaris i es puguin buscar i al clicar a l'usuari que porti al detall de l'usuari i els seus videos.

```
<style>
                                                                                                                                                                                                                       A7 ±3 €
</style>
<div class="max-w-4xl mx-auto □ □bg-[#0a0a14] p-8 rounded-lg shadow-lg border □ □ border-gray-700 mt
         <h1 class="text-2xl font-bold mb-6 text-center ■ ■text-[#12c2e9]">Usuaris</h1>
         <form method="GET" action="{{ route('users.index') }}" class="mb-6 flex items-center space-x-2">
                  <input type="text" name="search" placeholder="Cercar usuaris..." value="{{ request('search')}</pre>
                                   class=" ■ bg-[#12121a] border ■ ■ border-gray-600 ■ ■ text-black p-2 w-full rounded
                                   data-qa="search-input">
                   <br/>
                                     data-qa="search-button">Cercar</button>
         </form>
                   <table class="w-full | bg-[#12121a] border | border-gray-700 rounded-lg overflow-hidden t
                           <thead class=" Dbg-[#1a1a2e] text-[#12c2e9]">
                                     Nom
                                     Email
                                     Accions
                            </thead>
                                     {{ $user->name }}
                                               <a href="{{ route('users.show', $user->id) }}" class="■ ■bg-[#c471ed] ■ ■ho
                                                               data-ga="user-details-link">Informació Usuari</a>
```

• A helpers crear els permisos de gestió dels usuaris per al crud i assignar-los als usuaris superadmin.

```
public static function create_user_management_permission()
{
    $permissionName = 'admmistradorUsuaris';

if (!Permission::where('name', $permissionName)->exists()) {
    Permission::firstOrCreate(['name' => $permissionName]);
}

$superAdminRole = Role::firstOrCreate(['name' => 'super-admin', 'guard_name' => 'web']);
if (!$superAdminRole->hasPermissionTo($permissionName)) {
    $superAdminRole->givePermissionTo($permissionName);
}
}
```

A UserTest crear les funcions:

user\_without\_permissions\_can\_see\_default\_users\_page, user\_with\_permissions\_can\_see\_default\_users\_page, not\_logged\_users\_cannot\_see\_default\_users\_page, user\_without\_permissions\_can\_see\_user\_show\_page, user\_with\_permissions\_can\_see\_user\_show\_page, not\_logged\_users\_cannot\_see\_user\_show\_page

A UsersManageControllerTest crear les funcions:

```
loginAsVideoManager,
loginAsSuperAdmin,
loginAsRegularUser,
user_with_permissions_can_see_add_users,
user_without_users_manage_create_cannot_see_add_users,
user_with_permissions_can_store_users,
user_without_permissions_cannot_store_users,
user_with_permissions_can_destroy_users,
user_without_permissions_cannot_destroy_users,
user_with_permissions_can_see_edit_users,
user_without_permissions_cannot_see_edit_users,
user_with_permissions_can_update_users,
user_without_permissions_cannot_update_users
```

user\_with\_permissions\_can\_manage\_users, regular\_users\_cannot\_manage\_users, guest\_users\_cannot\_manage\_users, superadmins\_can\_manage\_users

 Crear les rutes de users/manage per al CRUD d'usuaris amb el seu middleware correspondent i la ruta de l'índex i el show d'usuaris. Les rutes del CRUD i les de l'índex i show han d'aparèixer només quan estàs logejat.

```
Route::middleware(['auth', 'can:admmistradorUsuaris'])->group(function () {
    Route::get( uni: '/users/manage', [UsersManageController::class, 'index'])->name( name: 'users.man
    Route::get( uni: '/users/manage/create', [UsersManageController::class, 'create'])->name( name: 'users.man
    Route::post( uni: '/users/manage', [UsersManageController::class, 'store'])->name( name: 'users.man
    Route::get( uni: '/users/manage/{id}/dedit', [UsersManageController::class, 'update'])->name( name: 'user
    Route::delete( uni: '/users/manage/{id}', [UsersManageController::class, 'destroy'])->name( name: 'users.);
});

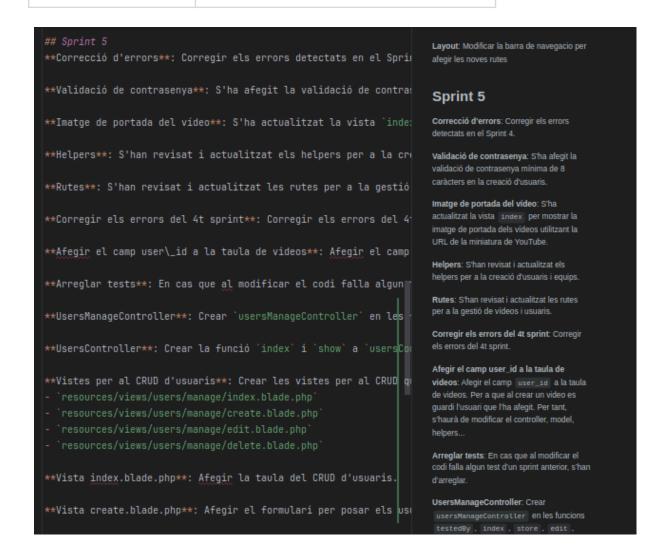

Route::get( uni: '/users', [UsersController::class, 'index'])->name( name: 'users.index');
Route::get( uni: '/users/{id}', [UsersController::class, 'show'])->name( name: 'users.show');
});
Route::get( uni: '/videos', [VideosController::class, 'index'])->name( name: 'videos.index');
```

S'ha de poder navegar entre pàgines.

Afegir a resources/markdown/terms el que heu fet al sprint.

Comprovar en Larastan tots els fitxers que heu creat.

```
Line app/Models/User.php

40 Property 'profile_photo_url' does not exist in model.

= rules.modelAppends
