enllaç github	16

INDEX

5e Sprint

Descripció del 5e Sprint:

Afegir el camp user_id a la taula de videos. Per a que al crear un video es guardi
 l'usuari que l'ha afegit. Per tant, s'haurà de modificar el controller, model, helpers...

Fico el camp al final del create

```
public function up(): void
{
    Schema::create( table: 'videos', function (Blueprint $table) {
        $table->id();
        $table->string( column: 'title');
        $table->text( column: 'description')->nullable();
        $table->string( column: 'url')->nullable();
        $table->timestamp( column: 'published_at')->nullable();
        $table->unsignedBigInteger( column: 'previous')->nullable();
        $table->unsignedBigInteger( column: 'next')->nullable();
        $table->unsignedBigInteger( column: 'series_id')->nullable();
        $table->timestamps();
    }
};
}
```

DAM 2n

• En cas que al modificar el codi falla algun test d'un sprint anterior, s'han d'arreglar.

FET

• Crear usersManageController en les funcions testedby, index, store, edit, update, delete i destroy.

Esquema per veure el arxiu creat

Les funcions testedby, index, store, edit, update, delete i destroy.

```
O UsersManageController.php ×
php 2025_01_23_143925_create_videos_table.php
                                                                        ▲ 15 x 3
 namespace App\Http\Controllers;
∨ class UsersManageController extends Controller
     public function index()
         $users = User::all();
         return view( view: 'users.manage.index', compact( var_name: 'users'));
     public function create()
          return view( view: 'users.manage.create');
```

• Crear la funció index i show a usersController.

Les funcions:

```
UsersController.php ×
   namespace App\Http\Controllers;
   class UsersController extends Controller
⊫

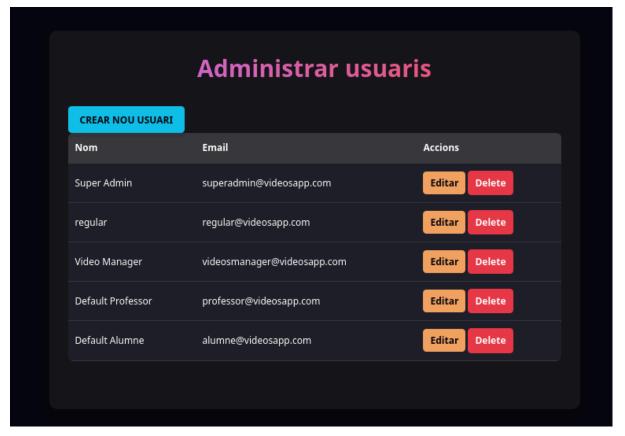

... «Marc»

       public function show($id)
          $user = User::findOrFail($id);
          return view( view: 'users.show', compact( var_name: 'user'));
       public function index()
          $users = User::all();
          return view( view: 'users.index', compact( var_name: 'users'));
```

 Crear les vistes per al CRUD que només poden veure-ho els que tinguin els permisos adients: resources/views/users/manage/index.blade.php, resources/views/users/manage/create.blade.php, resources/views/users/manage/edit.blade.php, resources/views/users/manage/delete.blade.php.

la vista:

DAM 2n

• A la vista index.blade.php, afegir la taula del CRUD d'usuaris.

```
<style>
                                                                     A1
</style>
<h1>Administrar usuaris</h1>
<thead>
     Nom
     Email
     Accions
  {{ $user->name }}
        {{ $user->email }}
           <form action="{{ route('users.manage.destroy', $user->id) }}" method="POST" onsubm
              <button type="submit" class="btn-delete">Delete</button>
```

• A la vista create.blade.php, afegir el formulari per posar els usuaris, s'ha d'utilitzar l'atribut data-qa per a que sigui més fàcil identificar per als testos.

```
46 ±1 ≥
<h1 class="text-2xl font-bold mb-4">Creacio nou usuari</h1>
                              Oforeach ($errors->all() as $error)
                                          {{ $error }}
          </div>
<form action="{{ route('users.manage.store') }}" method="POST" data-qa="form-create-user" class="</pre>
          <div class="mb-4">
                   <label for="name" data-qa="label-name" class="block | | text-white">Nom</label>
                    <input type="text" name="name" id="name" class="form-control border ■ ■border-gray-300</pre>
                    <label for="email" data-qa="label-email" class="block | | | text-white">Email</label>
                     <input type="email" name="email" id="email" class="form-control border ■ ■border-gray-306</p>
          </div>
          <div class="mb-4">
                    <label for="password" data-qa="label-password" class="block | | | text-white">Contrasenya</i
                     <div class="mb-4">
                     <input type="password" name="password_confirmation" id="password_confirmation" class="form</pre>
          <br/>
</form>
```

A la vista edit.blade.php, afegir la taula del CRUD d'usuaris.

```
<style>
                                                                                        ♣7 ±1 ≥
</style>
<div class="max-w-lg mx-auto | bg-[#8a8a14] p-8 rounded-lg shadow-lg border | border-gray-788
    <h1 class="text-2xl font-bold mb-6 text-center  text-[#12c2e9]">Editar Usuari</h1>
       <div class="mb-4">
            <label for="name" class="block | | | text-[#e6e6fa] font-medium">Nom:</label>
           <input type="text" id="name" name="name" value="{{ $user->name }}" required
                  class=" ■ bg-[#12121a] border ■ ■ border-gray-600 ■ ■text-black p-2 w-full
        </div>
        <div class="mb-4">

           <a href="{{ route('users.manage.index') }}" class="■ bg-[#c471ed] ■ ■hover:bg-[#a4</pre>
```

A la vista delete.blade.php, afegir la confirmació de l'eliminació de l'usuari.

DAM

2n

• Crear la vista de resources/views/users/index.blade.php on es vegin tots els usuaris i es puguin buscar i al clicar a l'usuari que porti al detall de l'usuari i els seus videos.

```
<style>
                                                                                                                                                                                                                       A7 ±3 €
</style>
<div class="max-w-4xl mx-auto □ □bg-[#0a0a14] p-8 rounded-lg shadow-lg border □ □ border-gray-700 mt
         <h1 class="text-2xl font-bold mb-6 text-center ■ ■text-[#12c2e9]">Usuaris</h1>
         <form method="GET" action="{{ route('users.index') }}" class="mb-6 flex items-center space-x-2">
                  <input type="text" name="search" placeholder="Cercar usuaris..." value="{{ request('search')}</pre>
                                   class=" ■ bg-[#12121a] border ■ ■ border-gray-600 ■ ■ text-black p-2 w-full rounded
                                   data-qa="search-input">
                   <br/>
                                     data-qa="search-button">Cercar</button>
         </form>
                   <table class="w-full | bg-[#12121a] border | border-gray-700 rounded-lg overflow-hidden t
                           <thead class=" Dbg-[#1a1a2e] text-[#12c2e9]">
                                     Nom
                                     Email
                                     Accions
                            </thead>
                                     {{ $user->name }}
                                               <a href="{{ route('users.show', $user->id) }}" class="■ ■bg-[#c471ed] ■ ■ho
                                                               data-ga="user-details-link">Informació Usuari</a>
```

• A helpers crear els permisos de gestió dels usuaris per al crud i assignar-los als usuaris superadmin.

A UserTest crear les funcions:

```
user_without_permissions_can_see_default_users_page, user_with_permissions_can_see_default_users_page, not_logged_users_cannot_see_default_users_page, user_without_permissions_can_see_user_show_page, user_with_permissions_can_see_user_show_page, not_logged_users_cannot_see_user_show_page
```

A UsersManageControllerTest crear les funcions:

```
loginAsVideoManager,
loginAsSuperAdmin,
loginAsRegularUser,
user_with_permissions_can_see_add_users,
user_without_users_manage_create_cannot_see_add_users,
user_with_permissions_can_store_users,
user_without_permissions_cannot_store_users,
user_with_permissions_can_destroy_users,
user_without_permissions_cannot_destroy_users,
user_with_permissions_can_see_edit_users,
user_without_permissions_cannot_see_edit_users,
user_with_permissions_can_update_users,
user_without_permissions_cannot_update_users
```

user_with_permissions_can_manage_users, regular_users_cannot_manage_users, guest_users_cannot_manage_users, superadmins_can_manage_users

 Crear les rutes de users/manage per al CRUD d'usuaris amb el seu middleware correspondent i la ruta de l'índex i el show d'usuaris. Les rutes del CRUD i les de l'índex i show han d'aparèixer només quan estàs logejat.

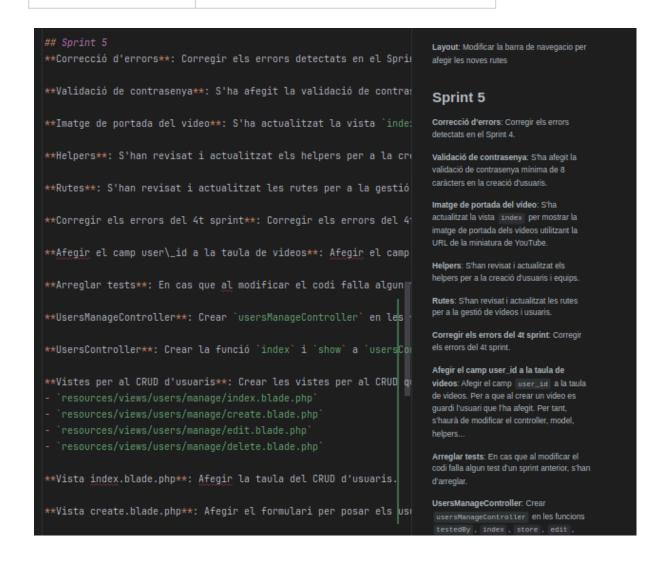

```
Route::middleware(['auth', 'can:admmistradorUsuaris'])->group(function () {
    Route::get( uni: '/users/manage', [UsersManageController::class, 'index'])->name( name: 'users.man
    Route::get( uni: '/users/manage/create', [UsersManageController::class, 'create'])->name( name: 'users.man
    Route::post( uni: '/users/manage', [UsersManageController::class, 'store'])->name( name: 'users.man
    Route::get( uni: '/users/manage/{id}/edit', [UsersManageController::class, 'edit'])->name( name: 'users.manage', [usersManageController::class, 'update'])->name( name: 'users.manage', [usersManageController::class, 'destroy'])->name( name: 'users.manage', [usersManageController::class, 'destroy'])->name( name: 'users.index');
    Route::get( uni: '/users', [UsersController::class, 'index'])->name( name: 'users.index');
    Route::get( uni: '/users/{id}', [UsersController::class, 'show'])->name( name: 'users.show');
});
Route::get( uni: '/videos', [VideosController::class, 'index'])->name( name: 'videos.index');
```

S'ha de poder navegar entre pàgines.

Afegir a resources/markdown/terms el que heu fet al sprint.

Comprovar en Larastan tots els fitxers que heu creat.

```
Line app/Models/User.php

40 Property 'profile_photo_url' does not exist in model.

= rules.modelAppends
